Social Security Trace

The SSN Trace provides the state and year of Social Security Number issuance, even when the number does not match the applicant information provided, **in addition to an expanded address history for the life of the SSN. This expanded address history shows all of the addresses where an applicant has resided and is used to select the counties to run for the manual County Courthouse Search.** All records are also indexed against a deceased registry to verify validity. **The SSN Trace is also a great tool for ensuring an applicant isn't intentionally omitting an address from an application, where criminal activity may have occurred.**

County Criminal Search

This is a jurisdictional **search** of the court records in any one of the more than 3,347 counties in the United States. **These records provide the most up to date information available and include pending charges, dismissed charges *and* any deferred charges (such as drug charges that may be deferred due to the offender's willingness to complete a deferral program such as probation or rehabilitation). A Nationwide Criminal Report will only capture convictions, so a County Search is essential in obtaining information about pending charges.** Cases held at the County level include felonies and misdemeanors as well as criminal traffic offenses. **HR best practices recommend doing searches for 7 years of address history per applicant, but ultimately the decision belongs to the client, and we are happy to guide clients through that decision-making process based on their particular needs and concerns.** Cost does not include any county fees, which if applicable will be passed straight through to the client.

Note: Research shows that on *average* an individual-lives in 2 – 3 counties in 7 years.
